## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-4, drawn to a light-emitting device, classified in class 257, subclass 79+;
  - II. Claims 5-6, drawn to a method of manufacturing a light-emitting device, classified in class 438, subclass 22+.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed through claim 5 can be made by another and materially different process by reversing the order in which the step of including phosphor particles in the transparent resin and the step of dyeing the resin are carried out (cf. "before being dyed", line 21).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
